COMMERCIAL BUILDING PLANS CHECKLIST

Review your plans and be sure each of the following details has been included. When each of the items have been verified, you are ready to submit your plans to the Fire Marshal and to the Building Official for a building permit. Your signature is required at the bottom of this form. **This is not an all-inclusive list and individual projects may require different information.**

SITE PLAN

___ Must meet all of the requirements outlined in County Code 17.128

BUILDING PLANS- Designed to the Currently Adopted Building Code

Three 24x36 size sets must be drawn to scale with the details listed below. At least one of these sets must be **wet-stamped by a Utah State licensed architect and engineer**. Before the Building Official will issue a building permit, the plans must be stamped by the **Fire Marshal** (who will keep one set). One set will be returned to you when the Building Permit is issued.

- ___ Type of construction (required) IBC 2012 Chapter 6
- ___ Occupancy type (required) IBC 2012 Chapter 3
- ___ Occupant load (required) IBC 2012 Section 1004
- ___ Written description of how the building will be used and occupied (be descriptive)
- ___ Square footage: each room's footage and building total footage
- ___ Front elevation
- ___ Rear elevation
- ___ Side elevations
- ___ Wall Cross section drawn specifically for the structure. Include detail for each individual wall type
- ___ Label wall section showing materials to be used, and stud spacing
- ___ Roof covering and roof detail
- ___ Footing size, depth and width (must be continuous) minimum 30" below grade for frost protection
- ___ Foundation wall height and width (extend a minimum six inches above grade) minimum 8" wide
- ___ Steel placement and size (for footings and foundation)
- ___ Framing details (Bracing as per IBC)
- ___ Wall covering and details. Interior and exterior
- ___ Roof framing details
- ___ Floor framing details
- ___ Size span and support of all beams and headers
- ___ Exterior finish materials (brick, stone, siding)
- ___ Fire separation, fire wall, fire barrier or any fire resistant construction detail
- ___ Insulation type and R-factor for walls, ceilings, floors and crawl space and U-factor for doors, windows and skylights
- ___ Com Check for the building envelope or equivalent. Software can be downloaded free from www.energycodes.gov

STAIR DETAILS (interior & exterior)

- ___ Rise and run and length of stairs
- ___ Stairway width
- ___ Landing at top and bottom of stairs
- ___ Headroom
- ___ Handrails and guardrails
- ___ Fire blocking detail
- ___ Any required sheetrock on underside detail

FLOOR PLANS

- ___ Layout of main floor with all rooms labeled
- ___ Layout of secondary floors with all rooms labeled
- ___ Egress path for all rooms with the furthest point clearly shown (include future furnishings and equipment in detail)
- ___ Door sizes and location shown
- ___ Window sizes and location shown
- ___ Attic and crawl space access locations labeled and size shown

ELECTRICAL DETAIL (PER NEC 2011)

- Breaker panel location is indicated
- Meter location and size is indicated _____ Amps
- Servicing clearances shown
- All lights, switches, and receptacles are shown
- GFCI's are shown
- Smoke detectors and/or fire alarm locations are shown
- Any required exit signs or lighting shown
- Com Check for interior and exterior lighting or equivalent

PLUMBING DETAIL

- Location of all plumbing fixtures, including stub in under-slab piping
- Accessibility for bathrooms and other plumbing facilities (provide details for each)
- 60" clear turn around in accessible bathrooms
- Required plumbing facilities per section 2902 of IBC 2012
- Water heater and drain locations
- Lateral water line size _____ inches

MECHANICAL DETAIL

- Design per section 312 of IMC 2012
- Duct sizing and installation per section 603 IMC 2012
- Gas pipe design size, length & location
- Furnace location and size
- Flue location
- Other gas appliances to be shown
- Com Check for Mechanical systems or equivalent

Additional information as required

*****Plans will be returned to you without approval until all items above are included.*****

By signing below I hereby certify that: I have reviewed my plans and verified that they contain the information listed above. I understand that the list above is not an all-inclusive list and that there may be additional information required dependent upon my project. I also understand that if my plans do not contain the required information that I will need to provide the missing information to the Building Department before a building permit will be issued.

Agreement for Electrical Meter

Temporary construction power shall only be used for the construction of a building and/or structure that complies with State and County Codes. Temporary power shall not be used for permanent occupancy.

The conditions for a permanent electric meter to be set in Uintah County require that the building and/or structure which will utilize the power from the meter will meet the following conditions:

- Will be constructed according to Uintah County zoning and building regulations along with applicable codes.
- All inspections will be completed as required.
- A certificate of occupancy will be received and approved before structure and/or building is occupied.
- The building, structure and/or electrical panel(s) must be lockable and the panel and sub-panel terminated.

MY SIGNATURE BELOW INDICATES THAT I HAVE CAREFULLY READ THIS DOCUMENT AND AGREE TO ABIDE BY IT. I UNDERSTAND THAT FAILURE TO DO SO CAN RESULT IN THE DISCONNECTION OF THE ELECTRICAL METER.

Chapter 17.128 - COMMERCIAL, INDUSTRIAL, AND APARTMENT BUILDING DESIGN REGULATIONS

17.128.010 - Objectives and characteristics of regulations.

A. The commercial, industrial, and apartment building design regulations have been established for the primary purpose of ensuring that future urban form and development enhances Uintah County. The regulations provide prospective developers with a clear statement of the design goals and objectives and development requirements for apartment, commercial/retail and industrial developments.

B. In order to accomplish the objectives and purposes of this title, and to stabilize and protect the essential characteristics of apartments and the commercial and industrial zones, the regulations set out in this chapter shall apply to all apartment buildings and commercial, retail and industrial buildings.

C. These guidelines address the visual image of all buildings within commercial and industrial developments. The prominence and location of buildings along major roads should encourage architectural design which is highly visible and innovative. Building envelopes that are well proportioned and aesthetically interesting on all visible sides are encouraged.

17.128.020 - Dumpsters and garbage collection systems.

All dumpsters and other garbage collection systems shall be in an enclosed, sight-obscuring, fenced area that is a minimum of six feet tall.

17.128.030 - Access to parking areas.

All accesses to any commercial, industrial or apartment buildings shall be asphalt or concrete, and must be connected to both a public or approved private street and to the required parking area.

17.128.040 - Lighting plan.

All applications shall include a lighting plan. The lighting plan shall be designed to:

1. Discourage crime;
2. Enhance the safety of the project;
3. Prevent glare onto adjacent properties and into the sky;
4. Enhance the appearance and design of the project.

17.128.050 - Landscaping guidelines.

A. All landscaping designs must be approved by the county planning commission.

B. Landscaping in accordance with the approved plan shall be installed or bonded for prior to obtaining a certificate of occupancy for the building. Erosion control must be undertaken when seasonal conditions do not permit immediate planting.

C. Each owner shall regularly maintain all landscaped areas of their property, keeping them in a neat and orderly condition, including the replacement of dead and unhealthy plant materials.

17.128.060 - Design review.

A. Application Deadline. The deadline for turning in a site plan is one week prior to the next planning commission meeting.

B. Application Fee. A nonrefundable application fee of two hundred dollars (\$200.00) must accompany each submittal.

17.128.070 - Design review requirements.

The planning office and planning commission are responsible for reviewing plans for all development, including construction of any type, landscaping, lighting, signage and deed restrictions. All plans shall be reviewed by the planning commission to determine their compliance with the covenants and county code.

17.128.080 - Related ordinances.

The following chapters of the Uintah County Code apply to all commercial, industrial, and apartment buildings constructed within Uintah County:

- A. Fencing and Screening. See Fence Regulation [Section 17.116.070](#)
- B. Signs. See Sign Regulation [Chapter 17.100](#)
- C. Parking. See Parking Regulations [Chapter 17.96](#)

17.128.090 - Additional requirements.

When an industrial business is located on property that has frontage on a state or federal highway a screening plan must be approved by the planning commission. The screening must obstruct the view of the industrial business from the highway. Some examples of screening that could be used include:

1. Trees.
2. Other types of tall vegetation.
3. Landscaped berms, etc.

17.128.100 - Buildings located within the urban boundary.

When a commercial, industrial or apartment building is located along a State or Federal Highway, Main Street or Aggie Boulevard within the "Urban Boundary" (see map in Appendix A) the following regulations will also be required:

- A. All facades facing public or private streets shall be constructed of high quality materials including the following:
 1. Masonry, including stone, brick, terra cotta, architectural pre-cast concrete, cast stone, prefabricated brick panels and stucco, glass and glass block, and or wood products.
 2. Up to forty (40) percent may be of another type of material that is integrated into the architectural design;
- B. Any side of a building facing any adjoining residence shall be aesthetically-enhanced with materials to match the front of the building;
- C. All required parking and/or customer parking areas shall be asphalt or concrete.
- D. A minimum of ten percent of all property must be landscaped. All areas not paved, used as parking or built upon must be landscaped and, where necessary, irrigated. Forty (40) percent of total landscape requirement must be vegetation. Use of water conserving trees, shrubs, and groundcovers are recommended.

Appendix - A
