

Hello,

We wanted to put in some information on the pros and cons of the Prop 5 that will be going on the ballot in November.

Pro's:

It will provide stability to transportation budgets within the County, the City and the Transportation Special Service District.

Duchesne County passed Prop 1 (Same as Prop 5) in 2015 and are greatly benefiting from the additional revenue, providing solutions to some long standing issues such as sidewalks and making it more safe and walkable within the community

This will help support the Basin Transportation Association (BTA) (This is NOT Supporting the Utah Transit Authority in Salt Lake City (UTA))

Help support and reestablish the Wellness Wagon (The Radiation Vacation Van)

Assist with Roads, Sidewalks, pot holes and trail development

This will help people and families that have limited transportation get to Dr. Appointments, Shopping, and other events

Provides transportation for students to various schools including Terra Academy, USU and UBTEch

Provides transportation between Vernal, Roosevelt and Duchesne for people working in areas outside of where they live

Visitor's to our area will also contribute when they purchase non-food items

Con's

No one likes a tax increase (even though it is very small)

Thank you for your time,

Joel Brown, Vernal Chamber of Commerce
